

Art With Heart

Lesson #5

Age:
1st Grade

Objective:

- Students will use an appropriate instrument (an analog clock) for measurement.
- Students will learn how to write time correctly.
- Students will recognize the time periods given, and will be able to write the correct time shown on an analog clock.

Materials:

Art With Heart by Julie Woik

Pencils

Print out form that correlates with this lesson.

Optional - Send home letter to parents regarding this lesson.

See attached *Letter for Parents*

Activity:

Gather the children in a circle and read Art With Heart, showing everyone the illustrations. After the reading, hand out the form for this activity. Discuss how a Cuckoo clock works. Then ask them to fill in the form with the correct time allotments. Last but not least, have them cross out the clock that shows the time closest to what's on the Cuckoo clock.

Assessment:

Students will utilize a variety of strategies to identify time intervals. They will recognize the "on the hour" and "on the half hour" time slots, to help prepare them for the "minute to minute" changes a clock will make throughout the day.
