

We're Having A Ball!

Read each scenario carefully. Then work out the correct answer to the problem.

Answers for 2nd Grade - Lesson #5

Jackson went into Rockin' Reef to buy some beach balls. He started his day by buying 25 balls. Then he stopped at Echo's apartment, and gave her 15 of the balls. On his way to another friend's house, he stopped and picked up another 10 balls.

How many balls does Jackson now have? **20**

Crabby was invited to a huge birthday party. He was asked to bring a bunch of beach balls for all the games they were going to play. He gathered up the 9 he had at home, he borrowed 7 from his neighbor, 12 from his brother, 13 from his sister, and bought 34 from the store on his way to the party.

How many balls did Crabby bring to the party? **75**

Echo got a job at the toy store in Rockin' Reef. It was her responsibility to put all of the extra beach balls in the storage room. On the first shelf she packed 32 balls, on the second shelf she packed 38 balls, and on the third shelf she packed the last 30 balls.

How many balls did Echo put in the storage room? **100**
